## COVER LETTER

---

Dear Hiring Manager,

I am thrilled to apply for the Senior Programmer position. With over five years of expertise in Microservice architecture and one year specializing in GDS and the Airline industry adhering to IATA Standards, I am well-equipped to design and implement scalable, resilient microservices. My track record of successfully delivering high-quality, solutions across seven projects demonstrates my commitment to innovation and excellence.

Throughout my career, I have leveraged Software Design Principles and Architectural Patterns, Infrastructure, System design and integration, Java and Microservice Design patterns and Best practices, creating efficient and maintainable systems that meet and exceed business requirements. My technical expertise in backend development and passion for innovation allow me to contribute to cutting-edge projects and Deliver impactful solutions.

I am adept at utilizing cutting-edge technologies and frameworks, including those in the Spring Ecosystem, to build robust applications that cater to modern business needs. My proficiency in Java and the Spring framework enables me to develop performant and scalable solutions that stand the test of time. My passion for software engineering and my commitment to excellence align perfectly with your esteemed organisation's vision.

It would be a pleasure to learn more about the company's needs. I would welcome the chance to provide further insight into my technical abilities, personal attributes, and experience in building applications that are compatible with multiple applications. I am eager to bring my skills and expertise to contribute to the success of organisation.

Sincerely,
